On June 7th, 2024, our trading predictions displayed varied accuracy across different sectors. Commodities had a notable 100% accuracy for short positions, while Cryptocurrencies achieved a balanced 50% for long positions and 75% for shorts. Currency and Fixed Income sectors showed moderate performance, with Currency excelling in short predictions at 50%. Geography and Indices were less consistent, averaging around 50%. The overall average accuracy was 46.97%, highlighting room for improvement in our long predictions, especially in sectors and fixed income. These insights will guide our strategy refinement moving forward.

Note: The presented percentages represent the correctness of predictions in each trading direction for the specified date and week. It's essential to note that all forecasts are based on trading signals initiated from the closing time on Friday, closely aligning with the subsequent net Friday's closing time of the New York Stock Exchange. This timeframe provides a comprehensive perspective for evaluating the accuracy of predictions and aligning with the weekly trading cycle.
