The analysis of the trading predictions for the week ending Friday, July 12, 2024, shows a mixed performance across different asset classes. Notably, the predictions for long positions in Crypto, Currency, and Fixed Income were exceptionally accurate at 100%. Geography and Sectors also demonstrated strong long position predictions at 83.33% and 80% respectively. However, the predictions for short positions across all asset classes were consistently poor, with most at 0%. The overall average accuracy stands at 39.39%, highlighting a significant disparity between long and short position predictions.

Note: The presented percentages represent the correctness of predictions in each trading direction for the specified date and week. It's essential to note that all forecasts are based on trading signals initiated from the closing time on Friday, closely aligning with the subsequent net Friday's closing time of the New York Stock Exchange. This timeframe provides a comprehensive perspective for evaluating the accuracy of predictions and aligning with the weekly trading cycle.
